## SUMMARY

---

Recently completed a software development bootcamp where I developed a strong foundation in Javascript programming language. Highly motivated with strong analytical & problem-solving skills. Seeking a software developer role where I can continue to apply my expertise through hands-on projects.

## EDUCATION & CERTIFICATIONS

---

### The University of Texas at San Antonio

## WORK & LEADERSHIP EXPERIENCE

---

### The University of Texas at San Antonio Web Developer Bootcamp

*Student*

Remote

*September 2022 - April 2023*

- Topics covered include HTML, CSS, JavaScript, jQuery, Bootstrap, APIs, JQuery, ES6, Object-oriented programming, MVC paradigm, Sequelize, Testing, React, NoSQL, Express.js, Node.js, databases, MongoDB, MySQL and Git.
- Projects completed:
  - E-commerce backend API - Developed an express backend for an E-commerce API using node.js and MySQL. Using a REST API, requests can be made to view all, view one, create, update, and delete products, categories, and tags.
  - Employee Tracker - Command line application using node.js, MySQL, and an inquirer NPM package. Application allows users to keep track of employees, roles, and departments as well as update or make additions to these categories as needed.
  - Movie Search - Front-end application utilizing Javascript and two REST APIs. Searches pull data from IMDB & Youtube APIs to display the most relevant movie facts, posters, and trailers for users' searches.
